## Article Number: 3014 – Air chamber measuring card LED

Light-emitting diode:	8000k-12000k, 1300 mcd yellow
Pushbutton:	SMD, 5,2mm x 5,2mm x 1,5mm
Dimensions:	84mm x 54mm x 2mm (Cr2032, 3D-cover, 10mm)
Weight:	20g
Range:	0mm - 20mm
Grade:	AA $\leq 3$ mm
	A $\leq 5$ mm
	B $\leq 10$ mm

## Shell Egg Grades

USDA shell egg grading is a voluntary service paid for by shell egg producers. As an independent third party, USDA is recognized for assuring that eggs meet the U.S. grade standards for quality and sanitary processing. Eggs are categorized into one of three consumer grades:

USDA Grade AA – The freshest and highest quality eggs will receive a Grade AA.

USDA Grade A – Very high quality eggs will receive a Grade A.

USDA Grade B – Grade B eggs are usually used for breaking stock (liquid eggs) and baking, depending on the number of defects.
